## 1. Plugging in your Apple TV

### 1.1 Plugging the power cable into the Apple TV

The following steps will detail how to plug in the power cable included with your Apple TV. Plugging in the power cable will allow you to turn on your Apple TV box which is a necessary first step in using your new Apple TV. You will need to have your Apple TV box, a power cable, and access to a power outlet.

#### To plug in your power cable

- 1) Plug the cable end labeled 'A' in Figure 1 into 'Port A' shown in figure 1 on your Apple TV box.
- 2) Plug cable end labeled 'B' in figure 1 into your electrical outlet; your Apple TV will now have power.

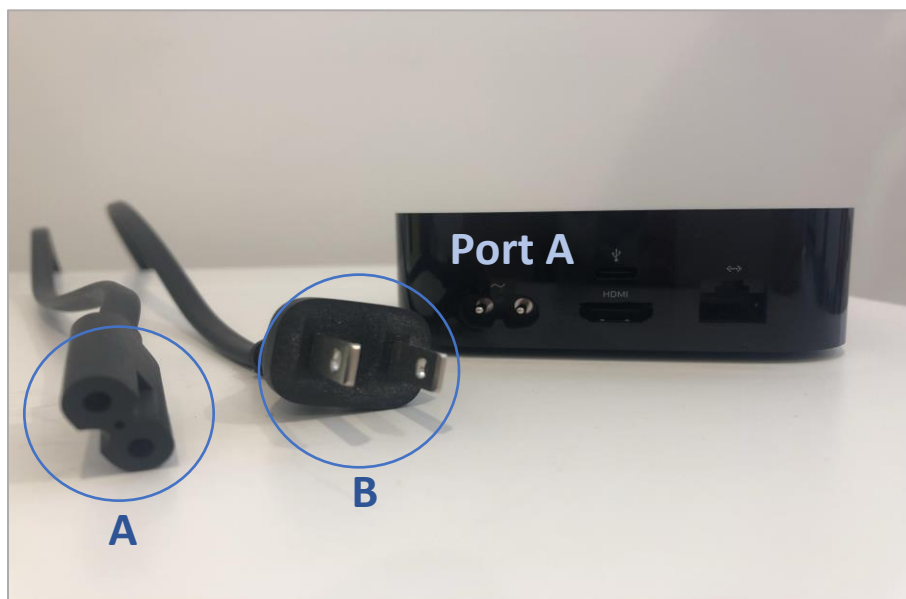

FIGURE 1

After completing the above steps, your Apple TV box will be successfully connected to a power source. In the next part of this chapter you will learn how to plug an HDMI cable into your Apple TV.

### 1.2 Plugging an HDMI cable into the Apple TV

The following steps will show how to plug your HDMI cable from your Apple TV box into your personal TV. Plugging your Apple TV box into your TV is an important step to allow you to display the output from your Apple TV. To complete this, you will need: your Apple TV, an HDMI cable, and a TV with an HDMI port.

**Note:** An HDMI cable is not included with your Apple TV purchase.

#### To plug in your HDMI cable

- 1) Plug one end of your HDMI cable into the port labeled 'HDMI' also shown in figure 2.
- 2) Plug the other end of your HDMI cable into the HDMI port found on your TV.

FIGURE 2

After completing the above steps, your Apple TV box is now connected to your TV using an HDMI cable. In the next section you will learn how to set up your Apple TV.

## 2. Setting up your Apple TV

### 2.1 Selecting a language

The below steps will show how to select the language you would like to use. The language settings allow you to select a language from a list of languages. To complete this step, you will need: your Apple TV plugged in and connected to your TV, and the Apple TV remote.

**Tip:** The language you select will affect all applications within the Apple TV's software. Ensure you are choosing a language you are comfortable navigating in.

#### To select your language

- 1) Click the menu button on the Apple remote to power on your TV box; the 'Select a Language' screen will appear on your TV.
- 2) Scroll through the list of languages by using the touch surface on the Apple remote; different languages will display.
- 3) Select a language from the list by tapping the touch surface.
- 4) Select continue; the next screen will appear.

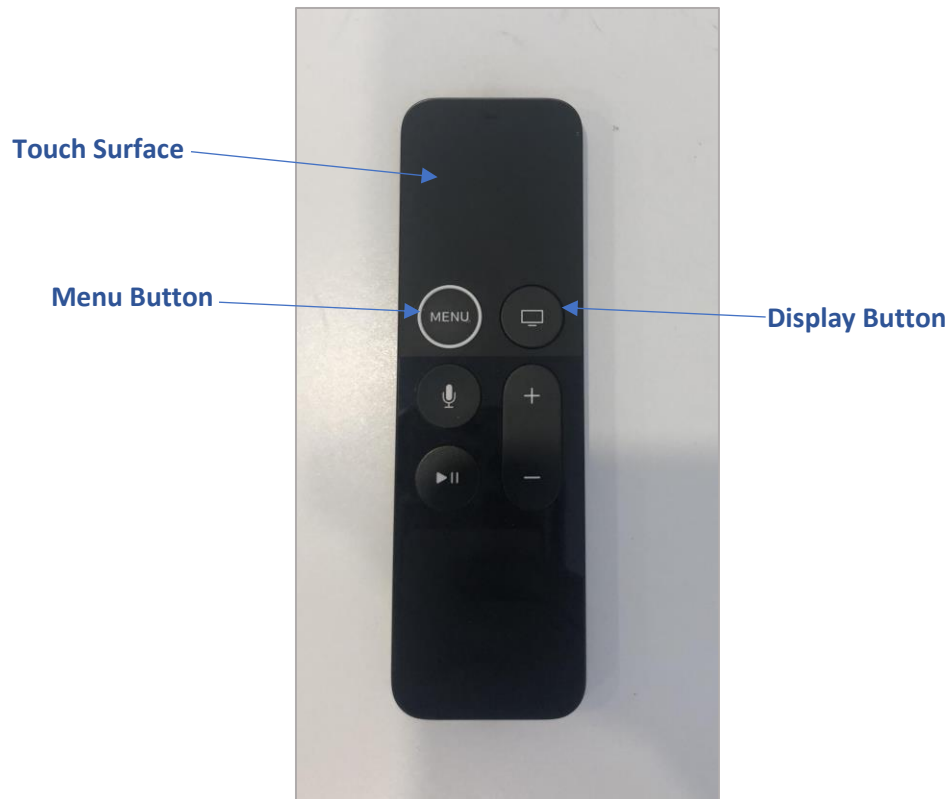

FIGURE 3

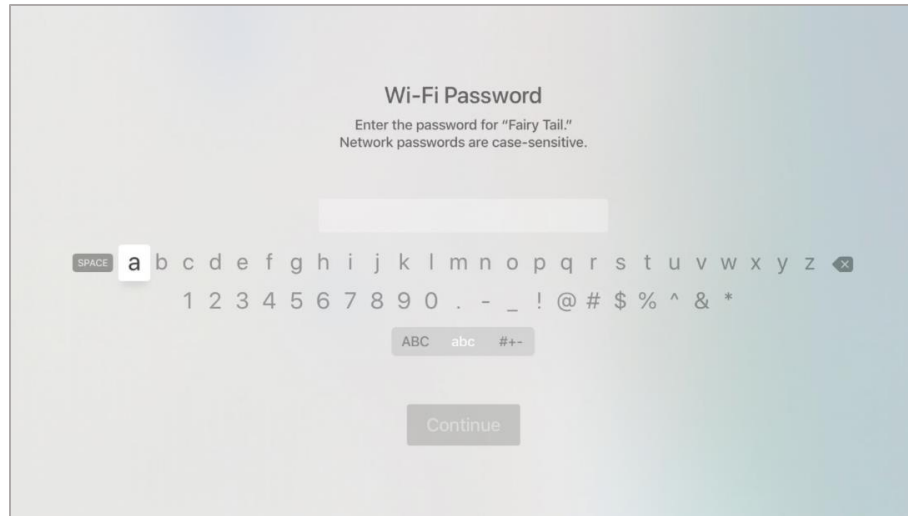

After following the above steps, you will have successfully selected the language your Apple TV will function in. In the next section you will learn how to connect your Apple TV to the Internet.

## 2.2 Connecting your Apple TV to the internet

The below steps will describe how you can connect to your local WI-FI network. The network option in the settings will allow you to connect to a WI-FI network in your range, giving you access to the internet. To use all your Apple TV's features, you will need to connect the Apple TV box to your internet. You will need to ensure you have a working network connection, and the credentials used to log into the network.

### To connect to your WI-FI

- 1) Select your network name from the list of names displayed, the screen shown in figure 4 will then appear.
- 2) Enter in your WI-FI password and select continue, a loading icon will appear.

**FIGURE 4**

**TIP:** if you are unable to connect to your internet then it may be a network-related issue. You will need to call your internet service provider to get further assistance.

By following the above steps, you will now have successfully connected your Apple TV to a WI-FI network. In the next section you will use this WI-FI connection to log into your Apple Account.

## 2.3 Logging into your Apple account

The below steps will describe how to log into you Apple account. By logging into your Apple account, you will be able to access data saved to your Apple account, as well as download music, shows, apps and more. To complete this you will need: your Apple TV box powered on and plugged into your TV, the Apple TV remote, and an internet connection.

### To log into your Apple account

- 1) Type in your Apple ID using the touch surface.
- 2) Select continue, the password screen will display - shown in figure 5.
- 3) Type in your Apple Password using the touch surface.
- 4) Select continue, the next set up screen will display.

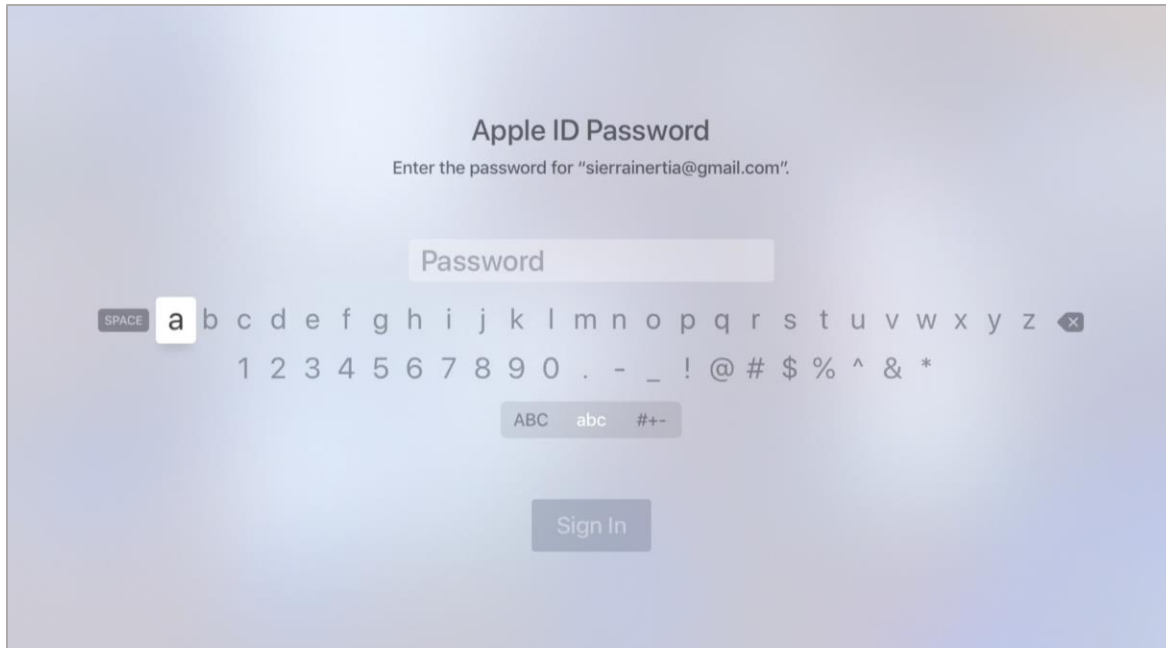

FIGURE 5

By following the above steps, you will now have successfully logged into your Apple account. In the next section you will learn how to download apps onto your device.

### 3. Downloading Apps

#### 3.1 Opening the App Store

The below step will show how to open the App Store. By opening the App Store, you will be able to download apps from Apple's list of thousands of available apps on the Apple TV. To complete the below steps you will need: your Apple TV plugged into your TV and powered on, the Apple TV remote, an internet connection, and your Apple credentials.

**TIP:** You can save your Apple login credentials in the App store to allow for easier downloading later.

#### To open the App Store

- 1) Navigate the Apple TV home screen and select the App Store app (see figure 6), the App Store will open.

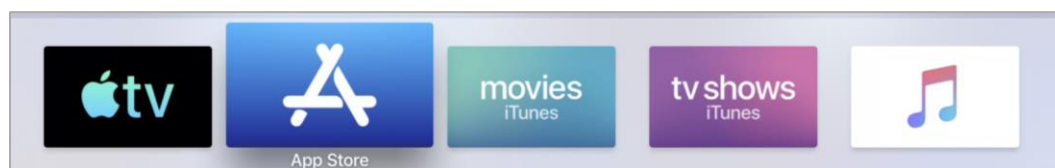

FIGURE 6

By completing this step you will now have the App store opened and ready for use. In the next section you will learn how to search for an App.

## 3.2 Searching for an app

The following steps will describe how to navigate the App Store. Searching in the App store will allow you to look for specific Apps you would like to have downloaded onto your device. To complete this you will need: your Apple TV turned on and plugged in, the Apple TV remote, and an internet connection.

### To search for an app

- 1) Select the search button found in the top right corner of the App Store, a keyboard will display (see figure 7)
- 2) Type in the search bar using the touch surface, as you type search results will appear.

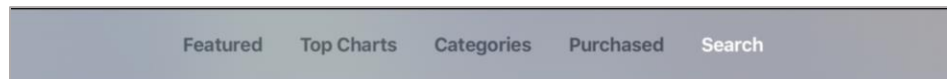

FIGURE 7

After following these steps, you will have successfully searched using the App Store search bar. In the next section you will learn how to download an app.

## 3.3 Downloading an app

The following steps will describe how to download an app from the App Store. Downloading Apps onto your Apple TV lets you use your Apple TV for different tasks. To complete this you will need: your Apple TV turned on and plugged in, the Apple TV remote, and an internet connection.

### To Download an app

- 1) Select an app you would like to download by highlighting it and clicking the touch surface, a new screen will appear with more information about the app.
- 2) Select the download icon (see figure 8) next to the apps name, a popup will appear with the commands 'Get' or 'Cancel'.
- 3) Select the 'Get' option, a sign-in screen will appear with a text box to enter your Apple ID.
- 4) Enter in your Apple ID
- 5) Select 'Continue', a new screen will appear with a text box to enter in your password.
- 6) Enter in your Password.
- 7) Select 'Get', the screen will return to the app's details page.

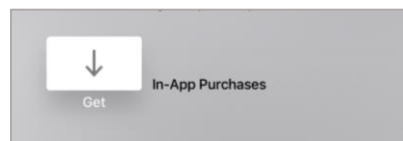

FIGURE 8

After completing the above steps, you will have successfully downloaded an app to your Apple TV.
