# Coffee vs espresso

Sierra MacDonald

## Introduction

An objective comparison report displays a subject's information in a simple way, by comparing criteria in an unbiased manner. In my below report I will compare the criteria of coffee to espresso to illustrate what makes them different.

## Comparison report

The following table compares regular coffee to espresso.

	Coffee	Espresso
<b>Caffeine per fluid ounce</b>	Avg. 16.5mg per ounce	Avg. 57.5mg per ounce
<b>Calories per fluid ounce</b>	2	1
<b>Roast types</b>	Light	Light
	Medium	Medium
	Medium - dark roast	Dark
	Dark	
<b>Brewing methods</b>	French Press	French press
	Automatic drip	Aeropress
	Stovetop moka pot	Stovetop moka pot
	Siphon	Espresso machine
<b>Average cost per cup</b>	2.70	3.94

## Conclusion

In conclusion, the above report displays what makes coffee different from espresso. This includes information on caffeine per fluid ounce, average cost of a cup, and different ways these beverages can be brewed.
